Will Organize For "Plebiscite" Vote

A meeting has been called for Friday, April 17th at the Legion hall for the purpose of organizing a committee to see that the affirmation vote goes over at the plebiscite which is to be held on April 27.

The following letter has been sent to all organizations in the district.

I have been requested by the Lieutenant Governor of the Province of Alberta to call a meeting of the representatives of all organizations in the town and district to make arrangements to ensure that the vote on the forthcoming plebiscite will be in the affirmative, which is of most vital necessity in order to preserve our National existence.

A meeting will be held in the Legion Hall on Friday, April 17. You are urged in the interest of Canada to have a representative at this meeting.

C. E. REIBER
Mayor.

Crossfield Joins Rosebud Health Unit

At the meeting of the board of the Rosebud Health Unit on Monday an application was received from the Village of Crossfield to be included in the Unit.

When the Unit was organized a year and a half ago, Crossfield refused to join with the other municipalities in forming the district. The good work being done by the Health Unit in the district surrounding the Village had been observed by the citizens and their council decided to join the other municipalities in protecting the health of the district.

NOTICE

Of Preparation of ASSESSMENT ROLL, 1942 For the Town of Didsbury

Notice is hereby given that the assessment roll of the Town of Didsbury, made under the provisions of the Assessment Act, has been prepared and will for thirty days be open to inspection at the office of the Secretary-Treasurer of the said town from ten o'clock in the forenoon until four o'clock in the afternoon on every day not a public holiday except Saturday, and on that day from ten o'clock in the forenoon until twelve noon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll, or to the assessment of any property, or to the assessed value placed upon any property, must within thirty days from the date of this notice lodge his complaint in writing with the Secretary-Treasurer.

Dated this 1st day of April, 1942.

W. A. AUSTIN,
Secretary-Treasurer

Contribute Seeds For British Airmen

Another "Bit" you can do for men in the Armed Services.

Every home has a flower garden and is proud of it. Would every home share its flowers with the boys in the R.A.F. who are in service here for the duration. The Didsbury School is collecting all extra flower seeds, bulbs, shrubs and cuttings to send to the two nearby training camps. The boys in the camps are looking forward to having their own bright flowers around their huts.

Gardening is a British tradition. To give our British boys a "touch" of home is to give them more courage to carry on their splendid work.

The School will receive all donations of extra seeds, shrubs, bulbs and cuttings by May 1st. Seedlings will be sent later. Would contributors kindly put the name of the seed enclosed on its container, and attach names to cuttings and shrubs.

Every contribution will be greatly appreciated.

Gasoline Hoarders To Get Into Trouble

While men are risking death in horrible form to supply our war and urgent business needs for gasoline, it has come to the notice of the officials of the Wartime Prices & Trade Board that some callous people with "fifth column" mentalities, tried to obtain gasoline for hoarding before the rationing regulation came into force.

Investigations are being made. Both hoarder and dealer, if convicted run risk of fine and imprisonment. In addition Hon C D Howe minister of Munitions and Supply, says he will have the tanks and pumps padlocked of any dealer found guilty of conniving with a hoarder.

It isn't only gasoline hoarding that is unpatriotic. Says Donald Gordon, chairman of the Wartime Prices and Trade Board "Anybody who buys more than actual current requirements of any supply of any kind, unless encouraged to do so by a direct statement by a responsible official, is definitely a public enemy."

Burn Stubble Now

Researches by Ducks Unlimited (Canada) show that destruction of Waterfowl nests by stubble burning in spring averages one nest to three acres in good duck breeding areas; to say nothing of the loss of meadow larks, prairie chicken, Hungarian partridge and other ground nesting birds.

This great destruction can be avoided if stubble burning is done soon, as few birds have started to nest as yet.

Early burning will prevent birds from nesting in stubble fields and thus save the nests from destruction from farm operations.

A Country-wide effort through Ducks Unlimited's more than 2,000 Keemen, the Western weekly newspapers and the Western Radio stations, is underway to eliminate this great loss of wildlife. All friends of wildlife are asked to co operate.

More birds mean fewer insects and less crop loss—thus contributing also to the the National War Effort

Another Corvette goes down the ways.

Canada asks you to vote "YES"!

Hitler asks you to vote "No"!

The Quislings suggest you don't vote at all!

Students for Jobs Jobs for Students

Have you odd jobs which need to be done or with which you need help? Digging the flower bed or garden, making minor repairs, looking after children, housework, or assistance in stores? Farmers do you need help on Saturdays.

In this period of national emergency when there is a shortage of labor for the necessary odd jobs in the community the students in the Intermediate and High Schools are willing and anxious to step into the breach and help you to carry on. The school staff is undertaking to bring employer and employee together.

The students of the Didsbury Schools are being registered and are ready to assist you with your work after four o'clock and on Saturdays. If you are in need of help get in touch with any member of the school staff, state the job and when you want it done. Give our boys and girls a chance to prove their metal.

1942 Wheat Permits

Farmers who are changing their farming operations for this year will be required to complete necessary forms within the next 60 days in order to receive a wheat marketing permit.

The form must be completed by the following classes of producers:

DIDSBURY MARKETS

Art Exhibit and Tea

Under the auspices of the Junior Committee of the Red Cross, an exhibition of pictures by members of the Artist's Society of Alberta (including some local talent), will be held in the domestic science room of the Public School on Saturday, afternoon, April 18th, from 3 till 6 p.m. Admission with tea 25c and without 10c

Live Stock Co-op. Have Successful Year

The annual meeting of the Mt. Co-operative Livestock Marketing Association Limited was held at Innisfail on Saturday, March 26th.

The reading of the reports showed that the Association had enjoyed its most successful year since its inception. The number of hogs marketed through the Association in 1941 was 41,885, valued at \$771,877.64; cattle 2,332 valued at \$124,010.49; and sheep 921, valued at \$6,200.38. Total value of livestock handled for the year amounted to \$913,078.52.

New contract signers during the past year numbered 69.

Following list of directors were re-elected: Esper Esperson, chairman, Olds; R. Stewart, Innisfail; M. B. Latam, Red Deer; P. Fox of Olds; S. H. Houckin, Bowden; H. Fleisckman, Markerville; S. O'Brien, Didsbury; W. D. Nesbit, Bowden; J. H. Hosegood of Didsbury. Business manager, John C. Dawson of Olds.

L.A.C. Lloyd Jenkins received his air gunner badge at the Gunnery Training School at Dabo, Sask., on Friday. He will now go to Rivers, Man., for further training as a pilot-observer.

Freedom Of Speech

Free speech is one of the privileges which we are fighting today to maintain. Criticism of the government has had an unquestioned place in the development of our social system, but we are at war with nations in which government as we know it does not exist, and where the mandates of one group dominate the whole country. Those who do not think in agreement with this group, either die, or live their lives within the walls of a concentration camp. All of us know something of the methods of the Gestapo, so evil and cunning that distrust grows among friends and even among members of the same family circle.

In comparison, freedom of speech, together with other privileges which belong to our way of life should, and in most cases have, become things which we value now even more than we did in the days before the whole democratic system was in deadly peril. However, ever since the outbreak of this war, there has been an element of the public and the press in all the free countries, which has abused the men who are in high office, and unduly criticized or belittled the war effort. Because of the necessity of keeping information from the enemy, the government, or the leaders concerned, are often unable to defend their acts, but valuable time, which is needed for urgent matters, may have to be devoted to rectifying impressions caused by malicious rumors.

Impeding War Effort

This is a total war, and there are laws in all the democratic countries against anything which interferes with the prosecution of the war. In England this law has already been invoked against certain newspapers which have failed to heed warnings that they must cease to print articles calculated to undermine the morale of the people and destroy their faith in the government. For some time there has been a group in the British parliament, made up, it has been said, of disgruntled office-seekers, which has been attempting to create dissension. Mr. Churchill has recently dealt with two political disturbances within parliament and there has been indignation in many quarters, at the time and attention he has had to devote to these matters, when there is so much of vital importance to the war to employ his entire energies. Lady Astor, one of the most severe critics of the government in normal times, has appealed to parliament to forget petty differences and support the Prime Minister in this critical period of our history.

President Roosevelt recently made an appeal in the same vein, when he stated at a press conference that malicious stories, founded on rumor, had created false impressions which it had taken a great deal of his time to correct. The president ironically quoted the historian Livy, to show that in this respect we are not different from the people who in 168 B.C. caused their leaders to deplore the trouble that resulted by ill-informed or irresponsible critics.

Must Not Be Divided

Constructive criticism and helpful suggestion has, and always will have, its place in our system, but malicious accusations and petty politics should be forgotten for the duration of the war, and we should all unite in the common purpose of defeating the enemy. Major-General F. F. Worthington, a great Canadian soldier, who has returned from England to command a new armoured division, said in a recent interview that this is a people's war and that we must have "a great national faith in liberty, and maintain it." Continuing, he said: "We criticize democracy, but who is responsible? We can't go back to where we were. We must go ahead. If I live through this war and come back I intend to take an interest in public affairs. Now it is everybody's business."

To have faith in our cause we must not be divided by doubts and small controversies. An intelligent interest in all public affairs in itself reveals the lack of foundation for many of the rumors we hear, and gives us an understanding of the great problems which we must face as a united people.

Danger! Liver Trouble is Serious

Are you nervous and irritable—can't sleep or eat—tired out all the time? If you're like that, a faulty liver is poisoning your whole system! Lasting ill health may be the cost!

● Your liver is the largest organ in your body and most important to your health. It supplies energy to muscles, tissues and glands. If unhealthy, your body lacks this energy and becomes enfeebled—youthful vim disappears. Again your liver pours out bile to digest food, get rid of waste and allow proper nourishment to reach your blood. When your liver gets out of order proper digestion and nourishment stop—you're poisoned with the waste that decomposes in your intestines. Nervous troubles and rheumatic pains arise from this poison. You become constipated, stomach and kidneys can't work properly. The whole system is affected and you feel "rotten," head-achy, back-achy, dizzy, tired out—a ready prey for sickness and disease.

Thousands of people are never sick, and have won prompt relief from these miseries with "Improved Fruit-a-tives Liver Tablets." The liver is tuned up, the other organs function normally and lasting good health results. Today "Improved Fruit-a-tives" are Canada's largest selling liver tablets. They must be good! Try them yourself NOW! Let "Fruit-a-tives" put you back on the road to lasting health—feel like a new person. 25c, 50c.

"Run Down For Years, Has Perfect Health"

Mr. Roy Dagneau, Chatham, Ont.

"Long Years of Suffering, Now Full of Life"

Mrs. A. J. Schwartz, Galt, Ont.

I was badly run down and terribly nervous. My digestion was poor and I was always constipated. "Fruit-a-tives" soon made me better and there is nothing like it for making you well and giving you new pep and energy. After years of bad health "Fruit-a-tives" made me feel fine.

For a long time I suffered frequent headaches and backaches. I could find no relief until I tried "Fruit-a-tives". The pains came less frequently until in a few weeks, they stopped entirely. "Fruit-a-tives" really made me feel like a new woman.

The Individual Citizen's Army

A Weekly Column About This And That In The Canadian Army.

By Alan Maurice Irwin

"We love our sergeants!" Do you remember the rest of the words that we sang to a bugle march in the last war? The song ended on a derisive note. But it was all good fun and while we may not actually have loved our sergeants we certainly got along well with them.

The "Colonel Blimps" have long been quoted as saying that "the N.C.O. is the backbone of the Army." I have a sneaking suspicion that they didn't say it when they were young officers, though.

Just who forms the backbone of the Army is, and probably always will be a moot point. Certainly it is a point that has no particular significance in an Army staffed by many officers who have been N.C.O.'s themselves not so very long ago.

What is more important is—where do N.C.O.'s come from? Who picks them? How does he pick? What qualifications must a man have to become a non-commissioned officer?

Let's go at those questions backward. Actually it isn't backward. It's the right way because the first step in making a N.C.O. is to find a man with the qualifications that fit him for promotion.

The first requisite is the intangible quality called leadership. What is leadership? A dozen different dictionaries will give you a dozen different definitions. So let's try our own! A leader is one who is instinctively given the respect and liking of his fellows and who has the ability to organize, direct and carry out an undertaking involving the co-operation of others.

You find them at all ages running sand-lot ball games, hockey teams and all sorts of organizations. They are the type of young fellows who do this sort of thing for the joy of it or for some civic reason—not the "bossy" type.

Well, that's the sort of fellow from whom you pick potential N.C.O.'s. And, the answer to the question "who picks?", is—every N.C.O., or officer who is on his toes. That is to say he "picks them" to the extent of passing along his observations to the Commanding Officer of the unit.

The average young soldier, working hard on his job, sometimes feels that promotion is hard to attain. It is, but he will probably be surprised to learn that there are probably more people on the lookout for N.C.O. material than there are looking for promotion. This army of ours today specializes in leadership. It is composed, down to the last private, of men who are trained to be capable of handling any situation without looking to higher quarters for guidance—if they find themselves on their own.

All training, therefore, tends to prepare the modern soldier to accept responsibility and every commanding officer is constantly on the lookout for men capable of doing so.

There are no courses for N.C.O. qualification as such. No man in the active army goes to school definitely to qualify as a Corporal or a Sergeant. But as many likely men as possible are sent to special courses at all Advanced Training Centres, Small Arms Schools and the Junior Leaders School.

They may be privates, they may be officers, they may be sergeants when they attend courses—a few days ago I was taken into a classroom in which officers, N.C.O.'s and privates were all paying attention to the same lecture.

This was a course in which they were teaching instructors to teach. That's one of the reasons why you never hear an instructor parroting the words in the book—the way you used to.

And that's where N.C.O.'s come from in this man's army. And it's where officers come from, too.

In other words the Individual Citizen's Army is manned and guided by men who know their stuff, by men who show themselves in their everyday life to be capable, after specialized instruction, of leading.

A good N.C.O. today still barks out his orders, but he barks them with the crisp authority of the man who knows what he is doing. Better still

his orders are obeyed with greater alacrity because his men know that he knows his stuff—and know that when they know as much as he does there's the first "dog's hind leg" waiting for them.

"Dog's hind leg"? A N.C.O.'s stripe. At least that's what we called them. The new army calls them "hooks."

Flavor Will Be Same

Vitamin "B" Flour Designed To Improve Quality Of The Diet

Introduced to remedy Vitamin B deficiency in the nation's diet, the widely heralded new vitamin B white flour (Canada approved) has made its appearance on the Canadian market.

Containing several times more vitamin B and more iron than the customary white flour, products made from the new flour will not be different in flavor, food experts state. Creamy rather than white in color, and designed to improve the quality of the diet without affecting the cost, its introduction is felt to be a vital step toward remedying that strange paradox of dietary lack in B vitamins in this greatest of all wheat-growing countries.

Mental depression, lack of morale, fatigue and irritability, stealthy fifth columnists in our war effort, are said to be attributable in large measure to deficiency of the B vitamins.

Monetary Unit Of Haiti

The gourde, monetary unit of Haiti, is named after the common gourd. Cristophe, a ruler of Haiti, confiscated and held, for a ransom of coffee, all the gourds in the country, in which the natives used to carry liquids. He then sold the coffee in Europe to establish a treasury.

A tarpon is a marine fish and a noted fighter. 2458

Canada's Metal Controller Has A Most Important Post In Providing War Materials

George Cecil Bateman may be remembered by the Canadian public as the man who took the tin out of cans, he may be remembered by soldiers as the man who found the metal for their tanks and guns and he may be remembered by miners as the executive who was at the helm when the Canadian mining industry went to an all-time high to meet war demands.

But this 60-year-old mining engineer from Toronto is concerned at the moment only with one thing, that Canada and her allies shall have cause to remember there was enough metal to fight through to victory. That's his job as metal controller.

He is one of the men who have stepped from private industry to a government position and is finding a government job without salary often means a lot harder work than an executive position in private life but he is enjoying it.

"It's a great struggle to keep your head above water, things crop up so fast; but I'm certainly glad to have an opportunity to do a job that contributes something to our war effort," he explains with a bit of a sparkle of enthusiasm in his blue eyes. The office in which he works, and from which have come orders sharply curtailing the place of metal in the life of the average Canadian, is a big one and obviously laid out for business.

Tucked away in a corner is Mr. Bateman's own desk. Large maps make splashes of color against the drab walls. Most important piece of furniture is a large table, surrounded by chairs at odd angles suggesting a recent conference.

That really tells the story of an average day for the metal controller—work at his own desks sandwiched between conferences. Being a direct sort of man, Mr. Bateman doesn't want to lose much time when he shifts from his desk to a conference and back. He talks directly, discussing Canada's wartime metal problems, but not at length—time is too valuable.

He sits behind his desk in the corner, a plain sort of desk, similar to hundreds at which minor clerks sit in government offices. A man of moderate height, rather stocky, bald, with a fringe of ruffled dark hair. He takes his pipe out of his mouth, covers the bowl with the palm of his hand when he talks.

He is serious when he talks of his job. He knows it is a serious job, in a mechanized war victory or defeat may easily hinge on metal, but there are periodic flashes of humor and a spontaneous smile.

Before he came to Ottawa last year, Mr. Bateman was secretary-treasurer of the Ontario Mining Association. Part of his job was developing co-operation among Ontario mine operators in accident prevention, in fighting silicosis, and in other fields of common interest.

Developing co-operation is part of his job now and he is equipped with plenty of authority to enforce co-operation, but there is little use for the "big stick" methods, he says. The mines are co-operating "wonderfully." And the public? "Well the public

is just a bit ahead of us," he says. "We told them restrictions were coming and they seemed to welcome them, they feel they are helping when they give something up, and they are. There will have to be more restrictions, too, there is no doubt about that."

Canada's metal contribution to the war is likely to have an important effect on her mining industry after the war, Mr. Bateman says. Already the largest metal exporting country in the world, war conditions have opened new fields and several important metals previously imported now are being produced in Canada.

Canadian mines may have a more important place in world trade than ever before, that is an interesting thought for this man who has mined iron in Nova Scotia, silver in Mexico and gold in Ontario; but right now he hasn't much time to think about it. He is too busy finding metal to fight this war with.

Still A Rebel Nation

Korea Waiting Opportunity To Fight Japan And Regain Freedom

Japan began her career of expansion with the conquest of Korea. This jutting peninsula represents her first foothold on the Asiatic mainland, and the subjugation of the Korean people served as the pattern for the occupation of Manchuria and the attempt to dominate China. No doubt the master minds of Nippon are all primed to apply the same design and methods in Malaya, the Netherlands Indies, Burma, wherever they succeed in imposing their shotgun rule on the populations of the East.

But Korea exemplifies the flaw in the grandiose pattern, for Japan has never been able to tame the first land she conquered. Annexed in 1910, the Korean people, 25,000,000 strong, know from bitter experience what "brotherhood" and "co-prosperity" mean. Still a rebel nation, they are ready for any opportunity to fight for their freedom. Although the record of the democracies in keeping their pledges to respect Korean independence is nothing to be proud of, and our alliance with Japan in the last war prevented the extension of the right of self-determination to this subject race, the Korean leaders were inspired by the Fourteen Points to call a secret meeting to sign a declaration of independence. "Until the day of our final freedom," they affirmed in this document, "we shall always carry for the Japanese a sword in our hearts."

No Room For Jealousy

There will be no jealousy in British hearts over this spectacle of an American soldier in supreme command on British soil. In this war, says the Ottawa Journal, with all the free peoples of the world in the same tempest-tossed craft, there is no room for jealousy nor for anything of nationalist or racial pride. We live or we perish together. MacArthur, great and gallant soldier, is an added promise that we shall live.

Shipping Losses Heavy

About Quarter Of Japan's 4,000,000 Tons Has Been Destroyed

Since start of the war in the Pacific Japan has lost about one-quarter of the 4,000,000 tons of shipping she originally had available for troop transport, the allied review of international affairs, "Free Europe," estimated.

The publication said that in any further extension of Pacific operations Japan would face a shipping problem and "must exercise caution for about 130,000 tons of shipping are needed to transport a modern division with equipment."

"Free Europe" recommended a two-point program to aid the Russians and prevent a German-Japanese union:

1. Japan's forces must be contained on all present fronts; Australia and Northern Burma thus must be defended.

2. The German military machine must be attacked from two or three sides simultaneously, because once Germany is smashed the defeat of Japan would follow.

Just One Tanker

The gasoline refined from oil carried by one average ocean-going tanker will operate every ambulance, every police car, bus, truck, farm tractor, every gasoline engine used in industry, every gasoline marine engine, and every passenger car in Canada for one week.

Close Consultation On Food Supplies Maintained Between Ottawa, Washington, London

Want Bigger Bombers

R.A.F. Would Like To Have Many Sky Dreadnaughts

"We want bigger and better bombers and bigger and better bombs—the bigger the better," a Royal Air Force tactical expert said at Cairo. He added, referring to America:

"That is where you people come in. You build the big bombers. Britain will build fast, high-flying fighters. That is how to win the war."

Not all the airmen of the Middle East Command are unconditional devotees of the big bomber, but most of them assert that the increasingly strong anti-aircraft defences of armies in the field have made dive bombers less valuable.

The coming bomber according to these airmen, is a much bigger machine, like the B-24 Liberator, but they would like to see even bigger machines. The Douglas experimental giant B-19 is the kind of terror these young Britons would like to see in the forces of the United Nations.

The big bomber exponents see a cheerful future for the side that constructs the greater number of these sky dreadnaughts.

"Why, a plane like the B-19 can drop a bomb that can capsize a battleship even if it misses by 100 yards," they assert. "And," they remind Americans, "you build big bombers."

They argue that giant bombers could carry larger bomb loads and larger bombs at lower cost. If better anti-aircraft defences have diminished the value of the small bomber, which bombs at low altitudes, they say, better bomb sights notably that of the United States air forces have made big, high-flying machines more valuable.

"Give me a few Liberators, some thousand-pound bombs and see what happens to a concentration of General Rommel's (German) mechanized forces," a British tactician said.

Pilots Not Deceived

Knew Which Ships In Brest Harbor Were Dummies

Air Secretary Sir Archibald Sinclair told the House of Commons that the air ministry knew the Germans had dummy ships at Brest, while the Scharnhorst and Gneisenau were sheltering there, and asserted British pilots could distinguish between the fake vessels and the real ones.

Replying to Capt. Alec Cunningham-Reid, Conservative, who asked about the possibility that dummies were bombed in mistake for the escaped Nazi warships, the air minister said: "I can assure you there was no such mistake."

Will Have His Food

Hitler is to become a "gentleman farmer." He has secured a farm about 20 miles from Berlin and staffed it with ex-soldiers, who will produce the kind of food Hitler likes. The arrangements are being made by Meissner, Hitler's personal secretary.

With the United Nations committed to assist each other in food supply as well as in armaments, indications were seen in informed quarters at Ottawa that food rationing in Canada would be governed by conditions beyond her borders.

Officials in touch with the food situation said they could see no immediate indication of a need for further rationing regulations beyond those restrictions per capita use of sugar to three-quarters of a pound a week. But they warned the swift-moving international situation might change this opinion in short order.

Sugar rationing was applied in Canada not because of a shortage within the Dominion but due to the losses of United States sources of supply in the Pacific. Dominion authorities were agreed the Dominion should be associated with its nearest neighbor in the United Nations group in the conservation of supplies and consequent economy in shipping.

It was learned that close consultation on food supplies is maintained between Ottawa and Washington, as well as with London and other United Nations capitals.

Canada and the United States are both supplying food to the United Kingdom, and considerable United States supplies are going to Russia.

"As an instance of what the United Nations are doing it can be said that canned meat is sent from the United States to Russia," one source said.

"Canadian beef cattle exports to the United States in the first quarter of 1941 have been twice as large as those in the same period last year, and it is quite possible that some Canadian meat may thus have found its way to Russia. In any event, these Canadian cattle taken across the line have helped maintain United States supplies."

In respect to meat, as to other food supplies, Canadian conservation requirements would probably be governed by the outside demand, which was likely to expand.

The United Kingdom's imported food supplies have been affected to some extent by the Pacific war hindering shipments of butter, meat and similar products from Australia and New Zealand, but Canadian officials said they have no indication so far as to how much London will order from Canada to meet such deficiencies as may arise.

Scorched Earth Policy

Madame Chiang Kai-shek commended China's scorched earth policy to India in a broadcast which was part of an "India Day" celebration. The wife of the Chinese leader said the secret of China's successful resistance to Japanese aggression was a scorched earth policy "so complete that every means of life—food, fuel, even the rice bowls—were destroyed or carried away to prevent them falling into the hands of the enemy."

"What China has done India can do," she said.

Quisling of Norway is said to be suffering from sleeplessness. Why doesn't he try counting the number of people he betrayed?

Canada Establishes Unity of Command in Army, Navy and Air Force in Three Strategic North American Areas

Pacific command leadership is vested in Major-Gen. R. O. Alexander (left), with Air Vice-Marshal I. F. Stevenson (right), as senior air officer, and Commodore W. J. R. Beech commanding naval forces. General Alexander is former O.C. of Military District No. 2.

Atlantic command will be led by (centre), and Air Vice-Marshal A. L. Cuffe of Toronto (right). In each area it is an army officer who will have under him Com-
modore George C. Jones of the navy, who has been designated as com-
mander-in-chief. Air Vice-Mar-
shal Cuffe's command includes both the east coast and Newfound-
land.

MORE BARLEY NEEDED IN 1942

To fill the British quota Canada must produce and ship, in the form of bacon, some 5,250,000 hogs. In addition, Canada needs about 2,000,000 hogs for home consumption; in all, this country must produce some 7,250,000 hogs.

The National Barley and Linseed Flax Committee estimate that it will require about 145,000,000 bushels of barley to feed these hogs; about another 18,000,000 bushels to supply the multistep and millers, and provide seed for the farmers; in all, Canada should produce about 160,000,000 to 165,000,000 bushels. Eastern Canada produces about 20,000,000 to 25,000,000 bushels. This leaves about 140,000,000 bushels to be produced in Western Canada. Last year this area produced about 100,000,000 bushels. To increase this to 140,000,000 bushels means that 2,000,000 acres more must be planted to barley in 1942. This, with the amount required for export, and a reserve supply, will require over 2,500,000 acres increase.

This means a definite switch from wheat to barley. To insure that the farmer will not lose by this change, the government has guaranteed a price of sixty cents a bushel, basis No. 2 C.W. Sixrow in store Fort William, and a \$2 per acre bonus. If fed to hogs it is estimated that the barley will be much more profitable; about 72c per bushel, plus the \$2 per acre bonus.

It is therefore not only patriotic but profitable to increase the barley acreage. Each farmer should attempt to about double the acreage.

THE EFFECT OF OPERATING PLOWS AND ONE-WAY DISCS AT HIGH SPEEDS

(Experimental Farm News)

Most farm implements are now being operated at considerably higher rates of speed than previously. This is the result of the increase in operating speed of the farm tractor due to the advent of rubber tires on this machine. Plows and one-way discs have not been designed to operate at these higher rates of speed with a maximum of efficiency.

Tests conducted by the Dominion Experimental Station at Swift Current, states C. G. E. Downing, show that with an increase in speed of two miles per hour the draft of the one way disc is increased by 15 to 20 per cent, of the slow-speed moldboard plow by 30 per cent, and of the high-speed moldboard plow by over 25 per cent. It was further noted that the high-speed moldboard plow could be operated one mile per hour faster than the slow-speed plow giving the same draft and a similar job of plowing. These increases in draft are definite indication of corresponding increases in fuel consumption and cost per acre of tilling the soil. Therefore, it is more economical to pull larger sized units of these implements at slower rates of speed.

More important than the lighter draft is the fact that the better job of tilling resulted when these machines were operated at the slower speeds or the speeds for which they were designed. In the case of the plow, the pulverization was less and the furrows were turned over completely, presenting an even, lumpy, and trash-free surface. These ideal conditions were encountered when operating at 3 to 3 1/2 miles per hour, using

"At the crucial moment of this manoeuvre...he says 'Pass the sugar!'"

Don't Forget the Red Cross

the slow speed plow, and 4 to 4 1/2 miles per hour when using the high-speed plow.

Tests with the one-way disc show that at speeds of 3 to 3 1/2 miles per hour the soil was well turned over, partially burying and anchoring the trash. At the higher speeds the soil was pulverized very finely and the trash was thrown loosely on the surface.

The larger diameter disc leaves the trash anchored more firmly in the soil than does the smaller disc at the same speed of travel. The degree of pulverization is less with the larger size of disc. There is also a slight difference in draft in favor of the larger diameter disc. The small disc should be used in fields where stubble is short and scarce as it does not bury the stubble as much as the larger disc.

The pulverization of the soil increases very markedly regardless of speed as the soil becomes dry.

Brownlee Appointed U.G.G. Counsel

Appointed of J. E. Brownlee, K. C., LL.D., of Edmonton, Alberta, as First Vice-President and General Counsel of United Grain Growers Limited, was announced here by the President of the Company, R. S. Law. The appointment was made at a meeting of the Board of Directors of United Grain Growers Limited, held at Vancouver in connection with an inspection of the Company's terminal elevator at Vancouver. Mr. Brownlee succeeds on the Board of Directors of the Company, and as First Vice-President, Mr. D. G. McKenzie of Winnipeg, who recently resigned on his appointment as Chairman of the Board of Grain Commissioners for Canada. Mr. Brownlee's connection with the Company is of long standing. He became legal advisor in Alberta to the Grain Growers Grain Company in 1910. He assisted in bringing about the amalgamation in 1917 of the Grain Growers Grain Company and the Alberta Farmers' Co-operative Elevator Company Ltd., to form United Grain Growers Limited. He acted as general Counsel for the amalgamated Company until 1921 when he entered the Alberta Government and when he left political life in 1935, he again became General Counsel for the Company. He acted, in addition, as solicitor for the United Farmers of Alberta, and for various other Farm Organizations in the Province. Mr. Brownlee will make his headquarters at the Calgary Office of United Grain Growers Limited.

Thrift EQUIPS MEN

For the men of Canada's army, only the best will do. From tin hats to service boots their equipment must be the finest Canada can produce.

Good equipment costs money...large sums of money. And that money must be provided by the men and women of Canada out of current income.

How? By honouring pledges to invest in war savings certificates every month. By saving now, to pay war taxes when due. By saving now, to invest in Victory Loans should further loans be necessary.

This means that every Canadian must learn to live without some of the things he formerly enjoys. Watch your spending. Stern duty demands that we save for Victory now.

This Book will help you save. The Royal Bank Family Budget Book shows you how to budget your money. How to save by planned spending. Ask for a free copy at your nearest branch.

The ROYAL BANK of Canada

DIDSBURY (Alberta) BRANCH, F. DUNLOP, Manager

LOYAL CITIZENS DO NOT HOARD!

Hoarders are people who buy and store away goods beyond their immediate needs.

They want to be in an unfair position over their neighbors.

Hoarders are traitors to their country and their fellow citizens, because by creating excessive and unnecessary demands for goods, they slow down the war effort.

There is no excuse for "panic buying" and hoarding. Everyone will have enough, if no one tries to get more than a fair share.

Hoarding must stop! Every unnecessary purchase makes it more difficult for Canada to do a full war job.

THERE'S A LAW AGAINST HOARDING

It is against the law to buy more than current needs.

Violation of the law is punishable by fines up to \$5,000, and imprisonment for as long as two years.

AVOID ALL UNNECESSARY BUYING — AVOID WASTE MAKE EVERYTHING LAST THE LONGEST TIME POSSIBLE

In cases where it is advisable for you to buy in advance of your immediate requirements—such as your next season's coal supply—you will be encouraged to do so by direct statement from responsible officials.

Burnside Notes

Lone Pine W. I. held their April meeting at the home of Mrs. Bert Pross with an attendance of 30. Mrs. P. Schumaker took the topic "Education and better schools." Mrs. Bruce Sheils won the 10c draw and Mrs. W. Lyons the war saving certificate.

Mrs. Himmelrich, constituency convener was present and gave an interesting talk on W.I. matters.

Plans were made for a concert and dance to be given in the Lone Pine hall on Friday, April 17th. Admission: adults 25c; children 10c. Dance 25c. A good programme is being prepared and a good evening's entertainment will be provided. Come out and help the W.I. in their effort to raise some money for their war work.

Notes From the West

The Elkton Willing workers met at the home of Mrs. Arnold Blain last Thursday and a quilt was tied. It was decided to tease and card wool only at the next meeting to be held at Mrs. Haeners on Thursday, '23.

A large crowd attended the dance in the Rugby hall last Friday in honor of the newly weds. Mr. and Mrs. Earl Braun. Mr. and Mrs. Braun will make their home in the Zella district.

Rebecca Activities

On April 8th, the Rebeccas met at the home of Mrs. H. Baughman with 10 ladies present.

During the afternoon a quilt was stitched which is to be raffled. Proceeds to go towards the Rebecca fund.

It was decided that after the next meeting we would close down for a month during the busy season so all ladies please try to have all knitting and sewing finished for the next meeting. This week the overseas parcel went to Scotty Ross.

The next meeting will be held at E. Cogswells on Wednesday, April 22 so be in attendance every body.

Evangelical Church Notes

The theme on Sunday morning at 10:30 a.m. will be "A Searching Question, Will Man Rob God?" The Israelites were compelled to give their tithe to the Lord. We as Christians should give our tithes to express our gratitude and love to God, the giver of every good and perfect gift.

"The Lay Preacher, Noah," will be the subject at the evening service. Services at Jutland as usual.

United Church Notes.

The services on Sunday next and on April 26th will be in charge of Mr. S. Vernon Fawcett, B.A., and Divinity Student at St. Stephen's College, Edmonton. On Sunday May 3rd the guest speaker will be Rev. Robert Simons of Innisfail.

Sunday, May 3rd will be observed at Westerdale as Anniversary Sunday. Rev. Mr. Simons was the student minister at Westerdale in 1911. The church was opened in 1903.

Rev. J. M. Fawcett leaves on Friday evening for Lethbridge where he will be the speaker on the 25th anniversary of the First United Church Church, and dedicate a new Church at Picture Butte in the afternoon on April 19th. He will leave on Tuesday for Toronto to attend the meeting of the Executive of the General Council of the United Church, and the Transfer Committee.

CLASSIFIED ADS.

Strayed from the L. A. Meyer's farm, 3 miles east of town, 1 dark brown Shetland pony, gelding. Was seen west of town last Sunday. Please notify Mrs. J. Y. Shantz, or phone R 609.

Will the party who has the pipe vise belonging to the Builder's Hardware please return same at once. It is urgently needed.

For Sale: Mantle radio, Quebec heater, steamer trunk, suit case. Apply at cabin Sarid on Camp Meeting Ground, Viola Brabacher.

Dr. K. W. Neathby
Director, Agricultural Department
North-West Line Elevators Association

Cereal Variety Recommendations

No less than eight varieties of wheat are officially recommended in the prairie provinces. Due to the striking differences in soil and climate found in various regions, it is natural that some varieties should be particularly well adapted to certain regions. Each year standard and new varieties are tested at widely separated points. Hundreds of such tests are conducted, and the results carefully examined by provincial cereal variety zonation committees.

On the basis of experimental results, official recommendations are published; and these are distributed to all grain buyers of line elevator companies associated with the Agricultural Department of The North-West Line Elevators Association. Recommendations respecting oats, barley and flax are also included.

In order to achieve the best results in grain production, the farmer must be sure to grow the variety best suited to his local conditions, and he must have reasonably pure seed which will germinate and grow vigorously.

Crop Improvement Associations are now functioning in each of the three prairie provinces and through them the country elevator grain buyer becomes the recognized distributor of registered and certified cereal seeds. He will be glad to advise respecting recommended varieties, and will place seed orders with the Crop Improvement Association.

Several new varieties of oats and barley have been released during the past few years. The emphasis now placed on livestock products justifies more attention to securing the best varieties of coarse grains. Also, the Government is asking for more and more flax.

Sow only good seed of a good variety.

WORLD HAPPENINGS
BRIEFLY TOLD

British prisoners of war in Germany and Italy can start their own "dig for victory" campaign. The Royal Horticultural Society sent vegetable and flower seeds to all prison camps.

Blackpool food office thought someone was joking when this letter arrived: "Please can we have new ration books as the others have been eaten by our elephant." It was from a circus family.

L-Corp. Arthur Webb, who escaped from a prison camp near Danzig into Russia where he was interned until the Nazi invasion, has been awarded the Distinguished Conduct Medal.

Death adders in hundreds scurried past 100 men fighting a Queensland bush fire. The men were too busy to kill them, and the snakes were too busy to bite.

The Canadian Jewellers' Association presented to the government a cheque for \$109,014.76 for the purchase of five Hurricane fighters for the R.C.A.F.

First aid repair to houses in Great Britain during heavy raiding last year was as high as 72,000 a week, a Ministry of Health report stated.

A would-be recruit gave his age at 91. He said he was born in 1850 in Surrey, Eng., and claimed to have fought in Abyssinia in 1896.

Road deaths in Great Britain numbered 681 in January, compared with 741 in the corresponding month last year.

SO YOU'RE GOING
TO DO A PLAY?

The purpose of doing a play is to communicate to an audience the dramatic vision of the playwright. To do this it is necessary to examine some of the characteristics of the play in order to determine how the actor or actress should play the role. Or re-create the part in the pattern set out in the script by the author. I am going to suggest three ways of approaching this problem:

Analyzing The Part

1. What did the author intend that I should contribute to the whole play? Let us make a survey of the whole play first. Is it tragedy, or comedy or farce? Or is it fantasy or is it a pageant, or is it something improbable, a figment of someone's imagination. Is it a play for entertainment? Or does it stir up your emotions and you go home solving the problem and deciding what you would do if you were in that same situation?

Find The Purpose Of Your Part

2. If you have one of the leading roles in the show this should not be hard, watch your part in the play pattern. If you have a minor role, it may take a little more discovering. But each part is important, small or large, and if one little cog is missing the wheel will not run smoothly, neither will the play run smoothly if every part is not there and co-operating.

Stage Business

3. The actions the audience see—are found in brackets throughout the script and are usually there to give a fine index to many characteristics and help you with your biography.

At the end of any play, the audience may not be familiar with the technical terms but they know whether it was a convincing performance. I do not approve of allowing the cast to go down into the audience at the end of the play to receive the congratulations of the special friends, the cast know whether they did a good show and where they fell down. If they don't receive too many nice remarks they will endeavor to do better next time. But if they mingle with a group of admiring friends, they soon lose their balance and go home feeling that all the mistakes in the play were someone else's fault. End of this time. Mary Ellen Burgess, Box 326, Regina.

A TIMELY SUGGESTION!

CHEW BIG BEN

The PERFECT Chewing Tobacco

Will Not Endure

The "first communion" of the new Nazi church in Germany is appalling evidence of the pagan depths to which Hitler is dragging the youth of his country. Yet the creeds of tinkling cymbals and sounding brass are not new, nor have they ever endured. The spirit must be fed, and some day it is even possible that the deluded Nazis will cry out for the bread of life.

Time For Attack

History Gives Us Instances Of Effective Offensive Action

When Hannibal's armies were at the very gates of Rome the Romans sent an expeditionary force against his homeland of Carthage, and Rome won the war. When the infidel Turk threatened all Christendom, the West did not wait for him to come and conquer. The crusaders advanced to the Golden Horn, defeated the Turks and threw him out of Europe. At the first battle of the Marne Foch despatched to the indecisive Joffre this message: "My right is exposed, my left is heavily attacked, my centre is unable to hold its position. I cannot redistribute my forces. The situation is excellent. I shall attack." —Kitchener Record.

The Alternative

Being questioned whether he was in a position to keep a wife, Sandy confidently replied in the affirmative. "There's hardly a mornin'," he said, "but a' leave some o' ma parritch, in fact, if a' dinna get a wife soon a' maun get another pig."

DOES YOUR NOSE
CLOG AT NIGHT? DO THIS

Put 3-purpose Va-tro-nol up each nos-tril... (1) It shrinks swollen mem-branes; (2) Soothes irritation; (3) Helps flush nasal passages, clearing mucus, relieving transient congestion.

VICKS VA-TRO-NOL

Many Adventures

Sub-Lieutenant Of The French Navy Graduates From Air School

A former sub-lieutenant in the French Navy was among graduates at No. 3 Air Observers' School of the Royal Canadian Air Force at Regina. The Frenchman whose name is not being used, was aboard the French destroyer "Terrible" when it was sunk at Dunkerque, he was pick-ed up by a cattle boat which struck a mine and sank. Picked up a second time, he was landed at Le Havre but was captured by Germans.

Later he escaped from his prison camp.

JUMPER-FROCK FOR WAR
WORKERS
By Anne Adams

Your new war work demands a practical, washable uniform that will stand hard wear. You need more than one, so it must be inexpensive too. Pattern 4926 was adapted by Anne Adams from the women's defense uniform designed by the Department of Agriculture, and can be made economically at home. The button-front jumper apron slips on quickly over its own contrast blouse or over your dress. The pockets are set in the skirt seams to keep from tearing and the shoulder straps are cut in-one with the centre panel for the same reason. Make the blouse long or short-sleeved wear the collar open or closed. Let the Sewing Instructor help you finish quickly!

Pattern 4926 is available in junior miss sizes 11, 13, 15 and 17; misses' and women's sizes 12, 14, 16, 18, 20, 30, 32, 34, 36, 38 and 40. Size 16, jumper, takes 3 yards 35 inch fabric; blouse, 1½ yards contrast.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

FATIGUE IN WORKERS

Since war was declared, with the attendant necessity to step up production in factories, the work of industrial physiologists has been doubled and tripled. What makes a man produce so much work in one day, only half his output the next day, then double his production another day? Is it the length of time he works, the colour of the factory walls, or what he had for breakfast that influences his work output?

Some light is thrown on the subject by Dr. A. C. Ivy, well-known physiologist of Northwestern University, who spoke recently at the Congress on Industrial Health, convening in Chicago.

"Recently it was clearly demon-strated," said Dr. Ivy, "that the out-put of a group of workers in a shoe factory, who ate the ordinary three meals a day, was materially in-creased by providing a forenoon and afternoon lunch of a glass of milk and a piece of cake. The lunches prevented the usual falling off in production in the latter half of the morn-ing and afternoon. It was concluded that the decrease in output was not due to the work performed, but to the operators' need of food."

However, Dr. Ivy indicated that a glass of milk and a piece of cake was not the complete answer. When this was first tried, output was stepped up for a while, but later production resumed pretty much its original speed. It did, however, give the workers additional valuable minerals and probably indirectly kept the health of the workers at a higher level.

"The problem of what creates fatigue in workers cannot be solved by any group," says Dr. Ivy. "The physiologist and director of person-nel have much to contribute. The physician can contribute by giving advice regarding the health and nu-trition of the worker. Wise eating may be the answer."

A "ten-pounder" fish may weigh only 10 ounces, that being the name of an Atlantic coast species.

There are 232 definite forms of mineral crystals. 2458

"ALL THAT GLITTERS"

— By —
ANNE TEDLOCK BROOKS

CHAPTER XVI.

Tamar was shaking so that the bushes moved. She hastily stepped back, keeping within seeing distance of the two men in the car. Her heart pounded madly as the one called Nick started to get out.

"Don't get jumpy, Nick. This kind of job takes some real cast iron nerves. And as I said before, it has to be timed absolutely so that nothing will happen." Tamar lost the next few words as the major stepped on the starter. Well, I guess the place will do, but I wanted to see for my own eyes. We'll work the rest out in the office.

Tamar watched them leave with widening eyes. Something was about to take place that included she knew not what kind of crime. Nor did she know the time or the nature of the plot. The only thing she knew for certain was that this old picnic spot had suddenly become a potential scene for some black deed.

She waited until she was sure that the car had turned back on the main highway, and then she mounted Madcap and rode slowly along the trail. She could take no chances on those two men seeing her.

Tamar turned Madcap toward home. She heard a car behind her and started nervously, but as it passed she saw that the driver was Ransome Todd. She wondered what he was doing away from his office at the bank this time of the day. He waved a friendly arm in greeting and stopped, pulling off the highway onto the shoulder of the road.

"Having a ride?" he asked, as though he had not just talked with Dr. Forrester and had come out purposely to find her.

As Tamar pulled up beside him, he saw that her face was white and her eyes deeply disturbed. He wanted to lift her boldly out of Madcap's saddle and drive away with her and never give her up.

"If I drive slowly, can we walk Madcap back to Shadwell, behind the car?"

"Thanks, Ranny." Her voice was deep with something intangible. "Oh, I do want to talk with some one, Ran." She looked anxiously down the

road. "Did you meet Major Towne and some one just now in his big car?"

"Yes. They sped by me, breaking every one of Georgia's speed laws. I noticed especially, because I heard Sheriff Mack say that he intended clamping down again. There's been a lot of that since the Cricket Hill's opened up."

Ran got out and tied Madcap to the back of the car. "I'll drive slowly enough so that it won't hurt her feet." He got in beside Tamar and they rolled back on the paving. He looked at her questioningly.

Tamar said: "I hardly know how to begin. You've been right all along, Ranny. You never have trusted Major Towne, and now I have reason to believe that your judgment is correct."

Ransome said sharply, "Go ahead, Tam. What have you found out?"

"I went to our old picnic grounds, tied Madcap down the bank some distance, and went for a swim."

After she had cried her heart out about her mother, Ransome thought to himself. He could see the tell-tale marks on her eyelids, even though the cool waters of the Chestatee had almost obliterated them. "Yes?"

"And while I was drying out in the breeze, I heard a car coming along the trail. I dashed for my clothes and dressed quickly, for fear of being discovered. The car belonged to Major Towne and one of his office assistants. They sat there and talked about that being a good place for whatever they were contemplating."

"What do you mean?"

"That's what I don't know. It sounds so silly. Major Towne said that they'd have to be sure of it because they couldn't afford to take any chances. The other man said that Fetter had told him that no one ever came there, and that he had hired some 'really tough birds' to do the job. Oh, Ranny, what could it be?"

"That's what we'll have to find out. When is this to take place?"

"They didn't say exactly. One said the men would be here in about two weeks."

"If I so much as catch you outside the well-known and well-travelled bridge paths around Shadwell, I'm going to give you the spanking of your life." Ransome said grimly. "Tamar Randolph, I hope this will teach you a thing or three! What if they'd found you there this morning, after they'd discussed all of their intentions?"

Two large crystal drops rolled down Tamar's cheeks. Her silence was appalling, and Ran looked at her in time to see her wipe the tears away. Ran was abashed. He had left his office to find her and try to offer her comfort after the blow she had just received about her mother's condition, and here he had callously made her cry.

They were nearing the house now, and Ransome stopped the car, untying Madcap, led her to a gate and slipped the saddle off. He gave her a friendly little slap and turned her loose.

"We're going to take the afternoon off," Ran said to Tamar, when he got back into the car. "I'm going to kidnap you for the day."

"I really do want to go back and see Mother, Ranny." The red lips trembled and Ransome wanted to kiss them.

"Didn't you sent word by Phoebe

that you were going to Selby's for the afternoon?"

"How did you know?" Mother would wonder why she had changed her plans, and that would certainly need some explanation.

"I called. I ran into Uncle Doc just after you were there, honey." Ran slipped his strong hand over her small one.

His comforting fingers touched Tamar like no words could possibly have done. She suddenly knew why he was away from the office. That was like Ranny. He had left his work to find her so that he could help lessen the shock of the doctor's words.

Ransome paused briefly at the entrance of the brown columns at the lane. "Shall we go up to the house or do we take off the next few hours?"

Tamar's little fingers curled up over his long brown hand. "It will be better to stay away for a while longer, then I won't have to explain. I don't want Mother to realize that I know about her. She would worry about it so."

Ransome drove on past the two columns, and speeding up the car a little, said: "Let's get a picnic lunch and go to the old mill on Whistle Creek."

"Oh, Ranny, let's! Why, it's been years since we've been there."

Tamar realized suddenly that she had not thought about Christopher Sande during the last two hours, even if she were in love with him. Ransome drove the car up in front of a general store in the first little town. "Do you want to help me select the lunch?"

"Of course!" She wanted to go with Ran. She didn't want to remember Christopher just now. What could he possibly have to do with comforting her about her mother? And what part could he share in her new discovery about the Major, when he was under the man's employ? No, not Christopher today. Today she was very glad to have Ransome Todd with her. He would know just what to say and do.

They went into the store and, after much playful banter, selected the things that each liked.

The blazing sun was at its highest and sent off a dazzling sheen from Ranny's polished car. He drove faster now, and in a few minutes came to the old road that led to the widest part of the Chestatee where an ancient mill wheel creaked in the nearby branch of Whistle Creek.

Ranny parked the car in the clearing. The old cabin was weather beaten and the roof sagged at one end. "I'll bet it's full of rats and ghosts," said Tamar as they stood looking at it.

"We'll investigate later. I'll build a fire at once."

Tamar untied the packages and spread out a paper lunch set on a big flat stone. Then they ate their picnic lunch.

"I'm too full to talk or even think," Tamar said finally. Ranny picked up everything and put the packages back neatly into the cardboard box, and into the car. He came back and sat down beside her. They were silent for a long time, lazily watching the water.

"The stone-age had a lot of advantages in a way," Ranny said.

"In what way?" Tamar asked casually, moving a stick through the sand.

"Well, a man could fight for his girl with his hands," he said abruptly.

(To Be Continued)

Seeding Wheat Early

Early seeding of wheat is not so urgent as it was before the early ripening sorts were adopted. A date Noted Financier Puzzled His Lawyer son has been found best at Swift Current Experimental Station. The recommendation is that oats and barley be seeded first as they get most benefit from the early moisture.

Icebergs are formed of fresh water, since they are formed on land as glaciers, and break off as icebergs when they reach the sea. 2458

Made Journey Safely

But Seals Face Danger In Pacific
During Fall Trip

Happily unaware that the American continent is now engaged in a life and death struggle with Japan, the Alaskan seal herd has run the gauntlet of enemy waters and arrived in safety at their spring quarters off the coast of California.

Alaskan seals are creatures of habit. They bask off the American shore for five months, and then punctually every May they head north for the island of Pribilof, Alaska. Here the young seals are born, and learn sufficient prowess in the art of swimming to undertake the return journey. The young three-year-old males disport themselves separately in bachelor freedom, and a due proportion are killed for the sake of their skins—to make fur coats for ladies or a hat for Mr. Churchill.

The seal industry was, until recently, a joint arrangement between the United States, Canada and Japan; the valuable herd had, by careful conservation, grown to over 2½ million head. Japan is now an enemy and her 15 per cent. share is denied her. With sinister emphasis she says that the situation will not prevent her from killing on sight any seal who happens to get within her range.

Here lies the danger for next season. In the middle of September the herd leaves the comparative safety of the Alaskan coast and heads south via Japanese waters. In the vast expanse of the Pacific it fans out, each individual or family going off on its own concerns until January when they all foregather on the islands off California.

The diversion of human traffic from a danger zone is a task calling merely for "No Road" signs, a broadcast to motorists, or a handful of police on motorcycles. But can the Alaskan seal herd be warned next October to take the return journey down the American and Canadian coast instead of their habitual route by way of Japanese waters? Here is a nice problem for the scientist, the zoologist, and the fur administrator to solve.

Calculated In Minutes

Contracts awarded and commitments made by the department of munitions and supply last year totalled \$2,100,000,000 or the equivalent of a \$4,000 contract every minute of the day.

A FAMOUS BRAND

Ogden's FINE CUT

Founded in 1888 by one of the early West's most outstanding figures, the late W. R. Hull, the Pine Coulee Ranch was located near Nanton, Alberta. The brand is still in use by the Beaver Camp Ranch.

Making War Gauges

Many Machine Shops In Canada Now
Busy On Production

Approximately 85 Canadian machine shops are manufacturing the 25,000 types of gauges required in Canada for production of munitions used in modern mechanized warfare, the munitions and supply department announced.

"Expanded from a group of five shops in 1939, this essential industry is expected this year to double the number of basic items being produced," the department said.

Used in manufacturing or inter-checking parts of machines, guns, or ammunition, gauges are made of bronze, aluminum and steel. Two types of gauges are made, one for the manufacturer and the other for government inspectors.

Since the start of the war, the department said, orders have been placed for 155,000 gauges representing an expenditure of more than \$4,500,000.

PARADE

Sunday, April 19, at 13.00 hours.
Sgt.-Maj GARNER in charge

Miss Joyce Noble, of Calgary,
was visiting at the W. Devolin
home during the Easter holidays.

Mrs. Russell Ady was called to
Gliechen last weekend on account
of the illness of her mother, Mrs.
Sutherland.

LOCAL & GENERAL

Gunner Leslie Sheila, of the R.C.A.,
at Fort Brandon, Man., arrived here
on Monday for a two week furlough

Pte W. Persinger, who is training
with the R.C.A.S.C. at Valcartier,
Que., is spending his furlough at his
home East of town.

The Junior Ladies Aid will hold a
bazaar, food sale and tea in the
Knox Church basement on Saturday
April 25th.

Miss Jane Ellerton of Calgary and
Miss Mary McKee, of Edmonton,
have been visitors at Knox Manse
during the past week

Miss D. J. Clarke, of Coleman,
was visiting with her grandparents,
Mr. and Mrs. John Leisemer, a few
days last week

Mrs. Ranton had the misfortune
to fall and break her ankle last Fri-
day while visiting at Edmonton.
She is at present in the Royal Alex
Hospital.

The best place to buy Harness,
Horse Collars and harness repair
parts is a Scott's.

The Junior Aid will meet at the
home of Mrs. Mortimer on Mon-
day, April 20th. Members and
friends please note the change in
date.

Sergt-pilot Bob Barrett received
his wings at the Brandon Service
Flying Training School on Friday
and arrived home on Sunday to
spend his furlough here.

The Annual meeting of the Dids-
bury Curling Club will be held to-
night (Thursday) at the curling rink
at 8 p.m. Full attendance of mem-
bers is essential.

Word has been received by his
wife here, of the safe arrival in Great
Britain of Corporal Dean Crandle-
mire. Corporal Crandlemire spent
two weeks in Didsbury in January
renewing old acquaintances after an
absence of 12 years.

Sergt-Major Garner informs us
that he has received three new re-
cruits for the Light Horse in Riley
Moon, Bill Moon and Neil Gochee,
during the last week. He says there
is room for lots more and would be
pleased to interview any young men
from 17 to 19 and men from 35 to 70
with regard to joining up for home
defence.

Pilot officer Michael L. Holub has
arrived safely in Britain according
to word received by his parents, Mr.
and Mrs. J. Holub. Mike was born
at Lake Louise, and received his ed-
ucation here. He joined the R.C.A.F.
in July last year.

We have just received a spring
shipment of mens work shoes priced
from \$2.75 up at Scott's.

Mr. Ross Ford, Mr. E. Wiggins,
and Miss K. Collins of Didsbury;
Miss Francis McArthur and Mr.
George Dann of Olds; and Mr. Stan-
ley Clarke of Carstairs, were the
delegates from the Olds School Di-
vision who attended the A.T.A. con-
vention held in Calgary Easter week

"That Night in Rio," with Alice
Faye, Don Ameche and Carmen
Miranda, in technicolor, is the year's
glamor musical and will appear at
the Didsbury Theatre this week. It
is gay, romantic, tuneful and you're
sure to enjoy it! Next week George
Formby in "Let George Do It," will
be the feature picture.

To provide smokes for the Dids-
bury and District boys in the forces
overseas, a military dance will be
held in the Opera House on Tues-
day, April 28. This ball is sponsored
by the Women's Service Corps,
the 15th Light Horse, the I.O.D.E.
and the Canadian Legion. The
music will be provided by the Royal
Air Force Orchestra from Bowden.

Mr. and Mrs. Boorman, Betty,
Mary and Sam, went to Blackfalds
to attend the wedding of Mr. Boor-
man's niece, Miss Ruth Esther Mil-
ler, to Mr. Walter Kent of Calgary,
on Wednesday of last week. Mary
was the bridesmaid and Sam acted
as best man. Betty played the wed-
ding march and during the signing
of the register.

Spring Dry-Cleaning Prices still
in effect at Berscht's:

Suits 75c, Spring Coats 75c.
Pants, Skirts and Hats, 45c.
Ties 3 for 25c.
Phone 36 for pick up.

Earl Cummins and Harold Burns
went to Calgary last week to take
their medicals for the Airforce. They
were both accepted and will be cal-
led to report for duty at the end of
June.

How about work shirts? Scott
carries a good line from \$1.00 up.

How Will You Vote?

I have a vision of a scene in a
far off land, now occupied by
enemy hordes. The Ridge, Our
Vimy Ridge, the crosses row by
row.

I hear a voice. "Are you on
our side?" Is the Torch held
high? "Do we sleep in Fland-
ers Fields, we, whose lives
were sacrificed for you?"

The answer is "yes" or "no"
OLD SOLDIER.
